A companion resource which helps to understand the application and intent of the requirements of the International Plumbing Code.

A unique visual approach to interpreting and applying the 2006 International Plumbing and Sewage Code While other plumbing code books are annotated guides filled with almost as much legalese as the code itself, this is the only book to use illustrations as the basis for explanation, a bulleted format for text, and real-world case studies to explain how to apply and interpret the 2006 International Plumbing and Sewage Code.

The fast and easy way to understand the 2006 International Plumbing Code Written by authority by a veteran master plumber and master gasfitter, this indispensable resource interprets and annotates the 2006 International Plumbing Code using real-world examples and clear layperson language.

The 2006 International Plumbing Code addresses the design and installation of plumbing systems through requirements that emphasize performance. Provisions are provided for fixtures, piping, fittings, and devices as well as design and installation methods for water supply, sanitary drainage, and storm drainage. The code provides comprehensive minimum regulations for plumbing facilities using prescriptive- and

performance-related provisions. The objectives of the code provide for the acceptance of new and innovative products, materials, and systems. The 2006 edition is fully compatible with all the International Codes published by the International Code Council (ICC).

This comprehensive code comprises all building, plumbing, mechanical, fuel gas and electrical requirements for one- and two-family dwellings and townhouses up to three stories. The IRC contains many important changes such as: An updated seismic map reflects the most conservative Seismic Design Category (SDC) based on any soil type and a new map reflects less conservative SDCs when Site Class A, B or D is applicable. The townhouse separation provisions now include options for using two separate fire-resistant-rated walls or a common wall. An emergency escape and rescue opening is no longer required in basement sleeping rooms where the dwelling has an automatic fire sprinkler system and the basement has a second means of egress or an emergency escape opening. The exemption for interconnection of smoke alarms in existing areas has been deleted. New girder/header tables have been revised to incorporate the use of #2 Southern Pine in lieu of #1 Southern Pine. New tables address alternative wood stud heights and the required number of full height studs in high wind areas.

Provides up-to-date, comprehensive coverage that establishes minimum regulations for building systems using prescriptive and performance-related provisions.

With an emphasis on design and installation for optimum performance, the 2015 INTERNATIONAL PLUMBING CODE SOFT COVER sets forth established requirements for plumbing systems. This important reference guide includes

provisions for fixtures, piping, fittings, and devices, as well as design and installation methods for water supply, sanitary drainage, and storm drainage. The 2015 edition of the code includes information on public toilet facilities, as well as water temperature limiting devices, and replacement water heater installation. Using both prescriptive- and performance-related specifications, this code provides comprehensive minimum regulations for a variety of plumbing facilities, facilitating the design and acceptance of new and innovative products, materials, and systems.

The 2006 International Mechanical Code provides up-to-date, comprehensive coverage that establishes minimum regulations for mechanical systems.

The most current reference guide for promoting uniformity and consistency in zoning is now available. The 2015 INTERNATIONAL ZONING CODE provides comprehensive coverage of the various provisions and requirements, making it a must have for city planners, code officials, and developers alike.
