Is there much of a difference in performance between an 8 and 9.9 hp outboard? I am looking for one for my river hawk boat (weighs about 160) and was wondering if the extra 2 horsepower is noticeable. I have to keep it under 10 for motor restrictions. Thanks.

Prairie Preacher tells the story of a young Lutheran pastor who accepts his first call to a church in central North Dakota in 1955. Byron Ellison is assigned there for one year, at the end of which the congregation will vote to keep him on permanently. The year is full of trials and hardships for the rural church, even threatening its very existence. Pastor Ellison has much to learn about becoming an accepted member of the provincial area. He makes mistakes while helping his congregation deal with prejudices and the trials of life. He makes many good friends and at least one staunch enemy. The young man grows in faith as he is often tested. With humor and through tears, he grows in understanding about trust, forgiveness and acceptance as he shares tears and joy with his best friend and neighbors.

The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.
