Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based

social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

This textbook explores probability and stochastic processes at a level that does not require any prior knowledge except basic calculus. It presents the fundamental concepts in a step-by-step manner, and offers remarks and warnings for deeper insights. The chapters include basic examples, which are revisited as the new concepts are introduced. To aid learning, figures and diagrams are used to help readers grasp the concepts, and the solutions to the exercises and problems. Further, a table format is also used where relevant for better comparison of the ideas and formulae. The first part of the book introduces readers to the essentials of probability, including combinatorial analysis, conditional probability, and discrete and continuous random variable. The

second part then covers fundamental stochastic processes, including point, counting, renewal and regenerative processes, the Poisson process, Markov chains, queuing models and reliability theory. Primarily intended for undergraduate engineering students, it is also useful for graduate-level students wanting to refresh their knowledge of the basics of probability and stochastic processes.

Look, a White! returns the problem of whiteness to white people. Prompted by Eric Holder's charge, that as Americans, we are cowards when it comes to discussing the issue of race, noted philosopher George Yancy's essays map out a structure of whiteness. He considers whiteness within the context of racial embodiment, film, pedagogy,

colonialism, its "danger," and its position within the work of specific writers. Identifying the embedded and opaque ways white power and privilege operate, Yancy argues that the Black countergaze can function as a "gift" to whites in terms of seeing their own whiteness more effectively. Throughout *Look, a White!* Yancy pays special attention to the impact of whiteness on individuals, as well as on how the structures of whiteness limit the capacity of social actors to completely untangle the way whiteness operates, thus preventing the erasure of racism in social life.
