A coat color dilution, called lilac, was observed within the Jacob sheep breed. This dilution results in sheep appearing gray, where black would normally occur. Pedigree analysis suggested an autosomal recessive inheritance. Whole-genome sequencing of a dilute case, a known carrier, and sixteen non-dilute sheep was used to identify the molecular variant responsible for the coat color change ...

Encompasses all areas of urological cancers Combines clinical and molecular advances in one volume Only available book specific to the whole of urological malignancies Appeals equally to urologists and oncologists The well-known author has published over 250 research papers and eleven books on cancer and is also the founder of the "Prostate Cancer Charity"

This Open Access edition of the European Society for Blood and Marrow Transplantation (EBMT) handbook addresses the latest developments and innovations in hematopoietic stem cell transplantation and cellular therapy. Consisting of 93 chapters, it has been written by 175 leading experts in the field. Discussing all types of stem cell and bone marrow transplantation, including haplo-identical stem cell and cord blood transplantation, it also covers the indications for transplantation, the management of early and late complications as well as the new and rapidly evolving field of cellular therapies. This book provides an unparalleled description of current practices to enhance readers' knowledge and practice skills. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

This book is the third volume in the Oxford International and Comparative Insolvency Law Series. It addresses one of the critical issues of any insolvency by providing comprehensive analysis of the law and practice in relation to creditor claims. As with the two previous volumes in the series the book would provide a comparative view by setting out the relevant law and practice in over 20 jurisdictions drawing out the divergences and common features of domestic insolvency laws from a broad spectrum of countries. Areas covered include submission of claims, verification and admission of claims, ranking of insolvency and administration claims, treatment of non-enforceable claims, and voting and participation rights. Quality, uniformity and the high level of detail of National Reports are the key benefits of this volume. The book would assist practitioners in assessing which ranking and participation rights could be asserted by the various types of creditors in the jurisdictions covered. For scholars it would provide access to a wealth of information which is currently not accessible in English.

Tired of wasting hundreds of dollars on expensive wrinkle creams, drying lotions, and zit-zappers that just don't work? Well listen up, ladies. To really get gorgeous, you've got to change the way you feed your face. Cosmetics companies, women's magazines—heck, even most doctors—will swear that food doesn't affect the skin. But celebrity dermatologist Dr. Jessica Wu knows that's just not true. After years spent battling her own pimple-prone, "problem" skin (not to mention caring for some of Hollywood's most famous faces), she's learned that what you eat has everything to do with the condition of your complexion. Packed with patient testimonials and celebrity anecdotes from stars like Katherine Heigl, Maria Bello, Kimora Lee Simmons, and Lisa Ling, FEED YOUR FACE is an easy-to-follow, 28-day diet plan that will help you banish blemishes, wipe out wrinkles, shed unwanted pounds, and generally feel better—in your clothes and in your skin. Along the way, Dr. Wu will dish the dirt on her journey from Harvard Medical School to the glamorous Hollywood Hills, while offering realistic, practical beauty and diet advice for women of all ages. Want to soften your crow's-feet? Find out which foods will turn back time. Plagued by pimples? Discover the snacks that will erase stubborn blemishes. Did you know milk doesn't always do a body good? Feel a sunburn coming on? Learn why red wine may save your skin from peeling and flaking. What does a hard-partying rock star eat for good skin? So stop thinking about food in terms of what you can't have: no butter, no red meat, no fat, and no flavor. Instead, discover the foods that will keep you feeling full and looking gorgeous. Follow the FEED YOUR FACE Diet, and you can have pizza. You can go out for Italian, indulge in Chinese takeout, and dine at The Cheesecake Factory (with the help of the FEED YOUR FACE Restaurant Guide). Because you do have the power to change your skin. All you have to do is eat.

**Journal of Hematology - Ariez Publishing**

In our societyâ€™s aggressive pursuit of cures for cancer, we have neglected symptom control and comfort care. Less than one percent of the National Cancer Instituteâ€™s budget is spent on any aspect of palliative care research or education, despite the half million people who die of cancer each year and the larger number living with cancer and its symptoms. Improving Palliative Care for Cancer examines the barriersâ€™scientific, policy, and socialâ€™that keep those in need from getting good palliative care. It goes on to recommend public- and private-sector actions that would lead to the development of more effective palliative interventions; better information about currently used interventions; and greater knowledge about, and access to, palliative care for all those with cancer who would benefit from it.

"There has never been a book provoking more delirium, foolishness and irrational movements, without any relationship to Jesus Christ [than the Book of Revelation]." --Jacques Ellul, Introduction Known for his trenchant critique of modernity and of those Christians who celebrate their captivity to it, Ellul here cuts to the heart of the theological intention of the Book of Revelation, and thereby reveals the liberating gospel in all its offensiveness. Neither an exhaustive commentary nor a work of historical-exegetical analysis, Apocalypse is a provocative, independent interpretation. Ellul seeks to rescue Revelation from the reassuring and orthodox banality to which commentators often reduce it. The goal is to perceive the totality of the book in its movement and structure. "Architecture in movement" is the key to understanding Revelation's puzzling but simple message. This edition also comes with a new foreword by Jacob Marques Rollison who provides an essential aid for guiding readers through Ellul's thorough engagement with Revelation.

An analysis of the way postmodern novels respond to changes in the experience of time.

**Journal of Hematology - Ariez Publishing**

Education in general, and education for deaf learners in particular, has gone through significant changes over the past three decades. And change certainly will be the buzzword in the foreseeable future. The rapid growth of information and communication technology as well as progress in educational, psychological, and allied research fields have many scholars questioning aspects of traditional school concepts. For example, should the classroom be "flipped" so that students receive instruction online at home and do "homework" in school? At the same time, inclusive education has changed the traditional landscape of special education and thus of deaf education in many if not all countries, and yet deaf children continued to lag significantly behind hearing peers in academic achievement. As a consequence of technological innovations (e.g., digital hearing aids and early bilateral cochlear implants), the needs of many deaf learners have changed considerably. Parents and professionals, however, are just now coming to recognize that there are cognitive, experiential, and social-emotional differences between deaf and hearing students likely to affect academic outcomes. Understanding such differences and determining ways in which to accommodate them through global cooperation must become a top priority in educating deaf learners. Through the participation of an international, interdisciplinary set of scholars, Educating Deaf Learners takes a broader view of learning and academic achievement than any previous work, considering the whole child. In adopting this broad perspective, the authors capture the complexities and commonalities in the social, emotional, cognitive, and linguistic mosaic of which the deaf child is a part. It is only through such a holistic consideration that we can understand their academic potential.
