"Based on John L. Holland's typology of vocational personalities and work environments, ... individuals and environments are classified according to their resemblance to six ideal types: Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C)."--Cover.

Giving students the tools they need to succeed in college and work College and Career Ready offers educators a blueprint for improving high school so that more students are able to excel in freshman-level college courses or entry-level jobs-laying a solid foundation for lifelong growth and success. The book is filled with detailed, practical guidelines and case descriptions of what the best high schools are doing. Includes clear guidelines for high school faculty to adapt their programs of instruction in the direction of enhanced college/career readiness Provides practical strategies for improving students' content knowledge and academic behaviors Offers examples of best practices and research-based recommendations for change The book considers the impact of behavioral issues-such as time management and study habits-as well as academic skills on college readiness.

This book is designed to help people discover their ideal work. Using the author's ten-minute self-assessment, the book helps readers determine their personality style, then walks them through the range of career choices best for them. This guide will enable anyone to : 1. Identify the type of work that will inspire and exhilarate them. -- 2. Recognize the type of boss and work environment they need to thrive. -- 3. Confirm the rightness of the path they are on or help them find a better one. -- 4. Speed up their job search.

Life Skills Curriculum for High School Students. Includes units Goal Setting, Time Management, Study Skills, Professionalism, Money Management, and a Jungian Typology Based Career Assessment Test specifically designed for High School Students.

Most Americans no longer question whether and which students should be prepared for college. Rather, it is now widely accepted that ALL students should be prepared for postsecondary education in some form (e.g., certificate, 2- or 4-year degree), as these credentials are not only required for many jobs but are also the surest path to upward mobility (Carnevale, Rose, Cheah, 2011). There is also greater recognition that in addition to a more traditional approach to preparation for postsecondary education (e.g., taking college preparatory classes), students should also graduate high school with technical knowledge and employability skills to secure, retain, and advance their employment when they leave school, at whatever level that may be. Simply put, today ' s high school graduates need a broad-based education that combines an array of knowledge, skills, and experiences to prepare them for life after high school. And indeed, state ' s definitions of college and career readiness have broadened in recent years to include a variety of skills and dispositions, such as critical thinking skills, social emotional skills such as collaboration, and interpersonal skills such as resilience and perseverance (English, Rasmussen, Cushing, & Therriault, 2016). The Every Student Succeeds Act (ESSA) of 2015, the key federal K-12 legislation, explicitly supports the notion of a " well-rounded " student, emphasizing readiness in areas beyond its predecessor ' s (the No Child Left Behind Act, or NCLB) focus on core academic content. ESSA mandates that states ensure that students are provided an enriched, accelerated curriculum beyond courses and content areas in which state assessments are given (e.g., mathematics, reading) and that is aligned with the postsecondary experiences students are likely to encounter. ESSA also supports an expansion of readiness goals through provisions for the improvement of conditions for student learning that support social-emotional learning, intrapersonal skills, and other employability skills. And ESSA includes provisions in states ' accountability systems that support emphasis on broader definitions of readiness. Additionally, ESSA ' s accountability framework includes important principles for supporting a broader definition of what students need to know and be able to do once they graduate high school. Accountability systems under ESSA may include multiple measures of college and career readiness. Indeed, several states had already added a career-focused indicator prior to ESSA passing (such as pathway completion or technical assessment achievement) to their accountability systems, and the number of states publicly reporting such indicators continues to increase (Achieve & AdvanceCTE, 2016). As definitions and measures of college and career readiness continue to evolve, we know one thing for sure: we need to better prepare ALL students for success after high school. This book explores the ways in which some education researchers are approaching this task.

In a society where everyone is supposed to go to college, the problems facing high school graduates who do not continue their education are often forgotten. Many cannot find jobs, and those who do are often stuck in low-wage, dead-end positions. Meanwhile employers complain that high school graduates lack the necessary skills for today's workplace. Beyond College for All focuses on this crisis in the American labor market. Around the world, author James E. Rosenbaum finds, employers view high school graduates as valuable workers. Why not here? Rosenbaum reports on new studies of the interaction between employers and high schools in the United States. He concludes that each fails to communicate its needs to the other, leading to a predictable array of problems for young people in the years after graduation. High schools caught up in the college-for-all myth, provide little job advice or preparation, leading students to make unrealistic plans and hampering both students who do not go to college and those who start college but do not finish. Employers say they care about academic skills, but then do not consider grades when deciding whom to hire. Faced with few incentives to achieve, many students lapse into precisely the kinds of habits employers deplore, doing as little as possible in high school and developing poor attitudes. Rosenbaum contrasts the situation in the United States with that of two other industrialized nations-Japan and Germany-which have formal systems for aiding young people who are looking for employment. Virtually all Japanese high school graduates obtain work, and in Germany, eighteen-year-olds routinely hold responsible jobs. While the American system lacks such formal linkages, Rosenbaum uncovers an encouraging hidden system that helps many high school graduates find work. He shows that some American teachers, particularly vocational teachers, create informal networks with employers to guide students into the labor market. Enterprising employers have figures out how to use these networks to meet their labor needs, while students themselves can take steps to increase their ability to land desirable jobs. Beyond College for All suggests new policies based on such practices. Rosenbaum presents a compelling case that the problems faced by American high school graduates and employers can be solved if young people, employers, and high schools build upon existing informal networks to create formal paths for students to enter the world of work. A Volume in the American Sociological Association's Rose Series in Sociology

Students who use their natural talents achieve the most --- but they need to know what those talents are. StrengthsQuest includes the Clifton StrengthsFinder, an online assessment that reveals students ' top five themes of talent. And StrengthsQuest also helps students make the most of those talents. Students and learners of all ages continually face the challenges of gaining direction, making decisions, and building self-confidence. Fortunately, the keys to successfully meeting these challenges — your own natural talents — already exist within you. Through these talents, you will produce your greatest achievements. Over the course of 30 years, Gallup conducted millions of psychological interviews and identified 34 themes of talent that are indicative of success. In the StrengthsQuest program, Gallup offers you the opportunity to discover talents from your top five themes and build on them to achieve academic, career, and personal excellence. More than 100,000 students have benefited from the program. Your quest starts with the Clifton StrengthsFinder, a 30-minute assessment that reveals your top five themes of talent. This online assessment is your entryway to a variety of experiences that will help you discover your greatest talents and develop strengths. You ' ll gain access to action items specific to your top themes, covering general academic life, study habits, relationships, and career. You ' ll also be challenged to think about applying your talents for success in other settings, such as on projects and teams and in leadership. StrengthsQuest was written by the late Donald O. Clifton, who was the former chairman of Gallup; coauthor of the bestseller Now, Discover Your Strengths; and recognized as the Father of Strengths-Based Psychology and the late Edward " Chip " Anderson, who taught education, psychology, and leadership at UCLA and Azusa Pacific University. Revised portions of the text were written by Laurie A. Schreiner, who has taught psychology and higher education at Azusa Pacific University and Eastern University. need to prepare during their undergraduate years to impress potential employers, land a higher-paying job, and start on the road to career security and satisfaction.

Test developed to assess interest in "non-professional" careers (requiring no postsecondary training or some college or technical/vocational school education). Written at 6th-grade reading level.

Create programs that prepare students for college, careers, and the new and challenging assessments of the Common Core State Standards Written for all educators but with an emphasis on those at the secondary level, this important resource shows how to develop programs that truly prepare students for both the Common Core assessments and for college and career readiness. Based on multiple research studies conducted by Conley as well as experience he has gained from working with dozens of high schools that succeed with a wide range of students, the book provides specific strategies for teaching the CCSS in ways that improve readiness for college and careers for the full range of students. Draws from research-based models for creating programs for high school students that will ensure readiness for tests and for college and beyond Includes strategies and practices for teachers to help students develop postsecondary preparedness Is the third in a series of books on readiness written by David Conley, including College Knowledge and College and Career Ready Teachers can use this valuable resource to understand the "big picture" behind the Common Core State Standards, how to teach to them in ways that prepare students for new, challenging assessments being implemented over the next few years and, more importantly, how to help all students be ready for learning beyond high school.
