model of protocols. Protocol specification requires a clear definition of both the services to be provided by a given protocol layer and the protocol entities within the layer that cooperate to provide the service. Verification, then, consists of two parts: (1) showing that the entities collectively

{Download}: Communication Protocol Specification and ...

Protocol verification consists of showing that two (or more) entities satisfying the protocol specification will provide at their service interfaces the specified service of that layer. The (verified) protocol specification is used mainly for the following two activities: The development of an entity implementation.
