Consultancy is increasingly being used to support mission and to help church leaders and workers in the challenges they face in their work. Helping churches and workers understand their situation and develop effective strategies demands skilful consultants who can handle issues of context and theology, the characteristics of voluntary sector organisations, and mission in a post-modern world. This guide to being a church consultant offers rigorous, practical consultancy theory and tools as well as pointing to a

Online Library Consultancy Skills Mission Ministry David Dadswell

rich range of methods and models for further investigation. By integrating the insights of practical theory, organizational studies, the social sciences and a range of helping skills, consultants will be able to support those who are leading change in churches in processes which are more explicit and carefully thought through than is often the case. This book encourages consultants to develop their own model and practice built on a healthy cycle of sound theory, evaluated practice and thoughtful feedback.

This two-volume work explores the management of religious and faith-based organizations. Each chapter offers a discussion of the earliest Christian organizations based on New Testament evidence; a study of managing faith-based organizations; and an exploration of secular management theory in relation to the management of faith-based organizations.

A textbook on preaching from an ecumenical perspective, covering the foundations and practice of preaching.

Most Christians know and understand that we are to seek to reach the lost around the world. Yet, Christ's command to us is more specific and calls us to a higher standard of involvement with the peoples of the world. He has called the church to make disciples of all people groups and to teach them to observe all He commanded us (Matthew 28:18-20). In recent years mission agencies and missionaries have

Online Library Consultancy Skills Mission Ministry David Dadswell

increasingly shifted away from discipleship and teaching toward an emphasis upon evangelism and church planting—many to the exclusion of any other field activity. While evangelism and church planting are essential components of a biblical missions program, they are not sufficient for the complete task to which we have been called. *Reaching and Teaching* examines the task Christ gave in the Great Commission and redefines the task of missions from that which is currently prevalent. It surveys missions strategies and methodologies that have increasingly replaced Christ's Great Commission instructions even as they have sought to fulfill it. It is a clarion call to return to the biblical task of reaching and teaching the nations for Christ's sake.

"Why are more churches not engaged in practical, substantial ways of taking the gospel to the nations?" *When Missions Shape the Mission* unpacks a statistical study of traditionally evangelical churches that reveals their anemic level of commitment to the biblical mandate of making Christ known around the world. Veteran pastor David Horner makes the data easy to understand, challenging other pastors to radically assign their best leadership and resources to missions as he looks at where the church is today, how it got there, and where we must go from here: "Let's dream a godly dream. What if you committed to step up and lead your church in the pursuit of becoming a mission-focused church? Then, what if you invited ten of your pastor friends to join you in the effort—and each of them did the same? What would happen to the available missions force beginning right here in the West?"

Short-term mission trips are great ways to impact the kingdom. Yet they can lack effectiveness because of mistakes or naiveté on the part of participants. In this insightful and timely book, David A. Livermore calls us to serve with our eyes open to global and cultural realities so we can become more effective
