The gold-standard guide from the AAP and ACOG -- newly updated and more valuable than ever! Significantly revised and updated, the new 8th edition of this bestselling manual provides the latest recommendations on quality care of pregnant women, their fetuses, and their newborn infants. Jointly developed by the American Academy of Pediatrics (AAP) and American College of Obstetricians and Gynecologists (ACOG), this unique resource addresses the full spectrum of perinatal medicine from both the obstetric and pediatric standpoints. New in the 8th edition: New section on suggested levels of maternal care from birth centers to Level IV institutions New sections on screening for preterm delivery risk added to chapter on antepartum care New topics covered include the timing of cord clamping, the need (or not) for bedrest, and updates in hypertension Guidance regarding postpartum contraception recommendations has been expanded New section on mosquito-borne illnesses (including Zika) New section on infections with high-risk infection control issues Updated recommendations on neonatal resuscitation, screening and management of hyperbilirubinemia, and neonatal drug withdrawal.

Winner of an AJN Book of the Year Award! This extensively revised and updated edition is designed to be used as a guide for nursing management of the common gynecological conditions of women, for use in community-based or ambulatory settings. The 8th edition has a number of special features: New information on contraceptive methods, the latest CDC guidelines for management of sexually transmitted diseases, information on smoking cessation and assessing risk of heart disease in women, osteoporosis assessment and prevention, management of abnormal Pap smears, hormone therapy, breast conditions and breast cancer risk, and emergency contraception. Extensive appendixes include dozens of patients handouts, a health history form, informed consent forms for contraceptives, and a self assessment of HIV/AIDS risk.

Revised and update to keep pace with changes in the field, the best-selling New Dimensions in Women's Health, Eighth Edition provides a modern look at the health of women of all cultures, races, ethnicities, socioeconomic backgrounds, and sexual orientations. Written for undergraduate students within health education, nursing, and women's studies programs, the text provides readers with the critical information needed optimize their well-being, avoid illness and injury, and support their overall health. The authors took great care to provide in-depth coverage of important aspects of women's health and to examine the contributing epidemiological, historical, psychosocial, cultural, ethical, legal, political, and economic influences.

Bioethics, Law, and Human Life Issues: A Catholic Perspective on Marriage, Family, Contraception, Abortion, Reproductive Technology, and Death and Dying draws on the Magisterial teaching of the Catholic Church to outline a Catholic response to a host of controversial issues related to human life. Scarnecchia lays out a Catholic moral theology based on the writings of Pope John Paul II and Thomas Aquinas, and he then applies those Christian moral principles to today's most contentious ethical issues, including reproductive technology, embryo adoption, contraception, abortion, family and same-sex marriage, and euthanasia and assisted suicide. This review of Catholic moral principles brings together an in-depth consideration of the central human life issues of our day with abundant reference to the Church's social teaching and to contrasting positions of today's leading ethicists.
