Haier TVs - Check the latest reviews, specifications, features, price & images of Haier TVs in Pakistan.

With over 30,000 employees worldwide and products that range from refrigerators to cell phones, Haier is the largest consumer electronics manufacturer in China. This book traces this giant's path to success, from its early bleak years when the company director had to beg from the neighboring village head for money to pay bonuses to his employees to its achievement of placing sixth on Forbes Global's worldwide household appliance manufacturer in 2001. Much emphasis is given to Zhang Ruimin, Haier's chairman and CEO, for his pivotal role in the company's success. Explained is how Haier excelled where many

other Chinese companies did not: a commitment to quality, service, and technology innovation, in addition to a global vision and a management style that is a blend of Jack Welch and Confucius.

Few countries have integrated into the world economy as fast - or as dramatically - as China has since 1978. The world's most populous country is emerging as a world workshop and export machine: a visit to a department store in any country will unearth a plethora of goods manufactured in the People's Republic. China is now the world's fourth largest exporting nation. In this important book, Kevin Zhang brings together an international team of contributors to analyze this development process. Taking a thematic approach, the book covers: * manufacturing exports and the world workshop * foreign capital and china's industrial development * challenges from the WTO and openness. This topical analysis will be an excellent resource for postgraduate students and researchers in the fields of Asian and Chinese studies, export studies, and economics.

implications____

Embedded Systems: An Integrated Approach is exclusively designed for the undergraduate courses in electronics and communication engineering as well as computer science engineering. This book is well-structured and covers all the important processors and their applications in a sequential manner. It begins with a highlight on the building blocks of the embedded systems, moves on to discuss the software aspects and new processors and finally concludes with an insightful study of important applications. This book also contains an entire part dedicated to the ARM processor, its software requirements and the programming languages. Relevant case studies and examples supplement the main discussions in the text.
