In this groundbreaking book, a leading clinical psychiatrist redefines how we think about and treat victims of trauma. A "stunning achievement" that remains a "classic for our generation." (Bessel van der Kolk, M.D., author of The Body Keeps the Score). Trauma and Recovery is revered as the seminal text on understanding trauma survivors. By placing individual experience in a broader political frame, Harvard psychiatrist Judith Herman argues that psychological trauma is inseparable from its social and political context. Drawing on her own research on incest, as well as a vast literature on combat veterans and victims of political terror, she shows surprising parallels between private horrors like child abuse and public horrors like war. Hailed by the New York Times as "one of the most important psychiatry works to be published since Freud," Trauma and Recovery is essential reading for anyone who seeks to understand how we heal and are healed.

Deals with healing for sexual, physical, or emotional abuse through self-examination and activities.

God's love is steadfast for survivors who chose to leave an abusive marriage but still suffer the aftershocks When someone leaves an abusive marriage, life isn't instantly fixed. Women who have experienced domestic violence feel shattered. Because of the trauma they've been through, a bond with their abuser has formed that keeps them tied together long after they've physically left. Karen DeArmond Gardner understands these difficulties all too well. She tackled all the same struggles when she left her own abusive marriage. And she intimately knows what women in this situation need in order to gain freedom from the lies of abuse-to be reborn as the people God longs for them to be. Hope for Healing from Domestic Abuse isn't a how-to book with a few easy steps. Instead, it's a biblically based map for a long journey to healing. By recounting her own history--as well as the faithfulness of God when she was willing to follow His direction--Karen helps readers: discover there is life beyond abuse recognize God's relentless pursuit of their heart gain courage to release the trauma of their past regain life, hope, and wholeness in Jesus's healing love Gardner's inside perspective, strong voice, and incredible, vulnerable story of deliverance from the bonds of abuse allow readers to find themselves in her words and feel heard at last. She puts hope back in their hands, with the assurance that God loves them deeply and wants them to know they aren't defined by their trauma, their past, or their brokenness.

#1 New York Times bestseller " Essential reading for anyone interested in understanding and treating traumatic stress and the scope of its impact on society. " —Alexander McFarlane, Director of the Centre for Traumatic Stress Studies A pioneering researcher transforms our understanding of trauma and offers a bold new paradigm for healing in this New York Times bestseller Trauma is a fact of life. Veterans and their families deal with the painful aftermath of combat; one in five Americans has been molested; one in four grew up with alcoholics; one in three couples have engaged in physical violence. Dr. Bessel van der Kolk, one of the world 's foremost experts on trauma, has spent over three decades working with survivors. In The Body Keeps the Score, he uses recent scientific advances to show how trauma literally reshapes both body and brain, compromising sufferers ' capacities for pleasure, engagement, self-control, and trust. He explores innovative treatments—from neurofeedback and meditation to sports, drama, and yoga—that offer new paths to recovery by activating the brain 's natural neuroplasticity. Based on Dr. van der Kolk 's own research and that of other leading specialists, The Body Keeps the Score exposes the tremendous power of our relationships both to hurt and to heal—and offers new hope for reclaiming lives.

Presents a self-help guide for overcoming post-traumatic stress disorder and codependency, outlining a twelve-step program focused on promoting healing and the development of independence and self-reliance.

In these personal reflections on his thirty years of clinical work with victims of genocide, torture, and abuse in the United States, Cambodia, Bosnia, and other parts of the world, Richard Mollica describes the surprising capacity of traumatized people to heal themselves. Here is how Neil Boothby, Director of the Program on Forced Migration and Health at the Mailman School of Public Health, Columbia University, describes the book: "Mollica provides a wealth of ethnographic and clinical evidence that suggests the human capacity to heal is innate--that the 'survival instinct' extends beyond the physical to include the psychological as well. He enables us to see how recovery from 'traumatic life events' needs to be viewed primarily as a 'mystery' to be listened to and explored, rather than solely as a 'problem' to be identified and solved. Healing involves a quest for meaning--with all of its emotional, cultural, religious, spiritual and existential attendants--even when bio-chemical reactions are also operative." Healing Invisible Wounds reveals how trauma survivors, through the telling of their stories, teach all of us how to deal with the tragic events of everyday life. Mollica's important discovery that humiliation--an instrument of violence that also leads to anger and despair--can be transformed through his therapeutic project into solace and redemption is a remarkable new contribution to survivors and clinicians. This book reveals how in every society we have to move away from viewing trauma survivors as "broken people" and "outcasts" to seeing them as courageous people actively contributing to larger social goals. When violence occurs, there is damage not only to individuals but to entire societies, and to the world. Through the journey of self-healing that survivors make, they enable the rest of us not only as individuals but as entire communities to recover from injury in a violent world.
