Graph theory concerns the relationship among lines and points. A graph consists of some points and some lines between them. No attention is paid to the position of points and the length of the lines. Thus, the two graphs below are the same graph. You can get more detailed information of graph theory at this site (http://www.netipedia.com/index.php/Graph_theory)

Here are my recommendations: the very nice introduction "Graph Theory and Complex Networks: An Introduction," by Maarten van Steen (~\$20), and "A First Course in Graph Theory," by G. Chartrand and P. Zhang (Dover, by ~\$20). That is, by ~1/2 of the money you get *two* more modern, thorough, and solid books.
