Landmark Cases in the Law of Contract offers twelve original essays by leading contract scholars. As with the essays in the companion volume, Landmark Cases in the Law of Restitution (Hart, 2006) each essay takes as its focus a particular leading case, and analyses that case in its historical or theoretical context. The cases range from the early eighteenth- to the late twentieth-centuries, and deal with an array of contractual doctrines. Some of the essays call for their case to be stripped of its landmark status, whilst others argue that it has more to offer than we have previously appreciated. The particular historical context of these landmark cases, as revealed by the authors, often shows that our current assumptions about the case and what it stands for are either mistaken, or require radical modification. The book also explores several common themes which are fundamental to the development of the law of contract: for instance, the influence of commercial expectations, appeals to 'reason' and the significance of particular judicial ideologies and techniques.

Go Beyond the FAR! The guidance contained in the almost 2000 pages of the Federal Acquisition Regulation and the various agency supplements are just a part of the resources government acquisition professionals need to do their jobs effectively. Accessing and understanding case law is equally important to a thorough understanding of government contracting. Legal decisions explain the Government Accountability Office's and the courts' views on how procurement statutes and regulations apply in a wide range of situations. Case law also gives potential bid protesters and agencies a way to gauge the likely outcome of a protest. Until now, it has been difficult to find and understand the legal decisions that could be relevant to a particular situation. Key Case Law Rules for Government Contract Formation changes that by organizing and explaining the most important protest grounds in a readily accessible and comprehensible way. With an emphasis on more recent cases, the book is organized around the key protest grounds, such as pricing issues, allegations that the government wrongfully prevented competition, or improper sealed-bidding procedures. Bridging the gap of understanding between the legal and the contracting communities, this book is a much-needed addition to the essential resources for acquisition professionals.
