Amazon.co.uk: plastic filler

The plastic causes the integration of the filling, while the filling material prevents premature abrasion (abrasion stability). Light effected hardening has almost completely replaced the two-component variant (blending procedure). The unsurpassed advantage of modern composites is the fact that the colour of the filling can be perfectly adjusted.

Plastic fillings - MEDECO Zahnkliniken

Plastics are organic materials, just like wood, paper or wool. The raw materials used to produce plastics are natural products such as cellulose, coal, natural gas, salt and, of course, crude oil. The term 'plastic' is derived from the Greek word 'plastikos', meaning fit for moulding. This refers to the material's malleability, or plasticity during manufacture, which allows it to be cast, pressed, or extruded into a variety of shapes - such as films, fibres, plates, tubes ...

What are plastics :: PlasticsEurope

The conveniences plastics offer, however, led to a throw-away culture that reveals the material's dark side: today, single-use plastics account for 40 percent of the plastic produced every year.

Plastic pollution facts and information

Some of the waste plastic retrieved by them was put into potholes, had petrol poured all over them, and the rubbish set alight until the plastics melted into the craters.

How To Help the Environment with Bottle-Filling Stations. The impact of plastic waste on the environment is well-documented, and widely known. Yet, despite ongoing efforts to raise awareness of the issue and encourage responsible usage and disposal of plastic, an estimated 5 million tonnes of plastic waste is generated each year in the UK alone. This means that on average, UK families throw ...
