For over a decade Living Justice has introduced readers to Catholic social teaching. Grounded in scripture, theology, reason, and experience, these faith-based principles for promoting justice and peace in modern society have inspired a remarkable burst of social activism in recent decades. The second classroom edition has been revised and updated throughout while maintaining the book's accessible introduction to both the foundations of Catholic social teaching and social justice in the world today. Living Justice leads readers step-by-step through the building blocks of Catholic social thought, including its central themes, sources, and methods. Along the way readers encounter great heroes of social change and prophets of peace and justice. Key updates to the second classroom edition include

further reflection on the use of the just-war theory in light of events in Iraq and Afghanistan, the revival of terrorist threats, the papacy of Benedict XVI, the social encyclical *Caritas in Veritate*, the recent financial crisis, business ethics today, and ongoing environmental concerns. With its helpful resources, including discussion questions and an annotated list of print and web resources on Catholic social teaching, *Living Justice* remains a perfect text for courses on social justice.

What is social justice? For Friedrich Hayek, it was a mirage—a meaningless, ideological, incoherent, vacuous cliché. He believed the term should be avoided, abandoned, and allowed to die a natural death. For its proponents, social justice is a catchall term that can be used to justify any progressive-sounding government program. It endures because it venerates its champions and brands its opponents as supporters of social injustice, and thus as enemies of humankind. As an ideological marker, social justice always works best when it is not too sharply defined. In *Social Justice Isn't What You Think It Is*, Michael Novak and Paul Adams seek to clarify the true meaning of social justice and to rescue it from its ideological captors. In examining figures ranging from Antonio Rosmini, Abraham Lincoln, and Hayek, to Popes Leo XIII, John Paul II, and Francis, the authors reveal that social justice is not a synonym for "progressive" government as we have come to believe. Rather, it is a virtue rooted in Catholic social teaching and developed as an alternative to the unchecked power of the state. Almost all social workers see themselves as progressives, not conservatives. Yet many of their "best practices" aim to empower families and local communities. They stress not individual or state, but the vast social space between them. Left and right surprisingly meet. In this surprising reintroduction of its original intention, social justice represents an immensely powerful virtue for nurturing personal responsibility and building the human communities that can counter the widespread surrender to an ever-growing state.

This volume brings into dialogue the ancient wisdom of Augustine of Hippo, a bishop of the early Christian Church of the fourth and fifth centuries, with contemporary theologians and ethicists on the topic of social justice. Each essay mines the major themes present in Augustine's extensive corpus of writings—from his *Confessions* to the *City of God*—with an eye to the following question: how can this early church father so foundational to Christian doctrine and teaching inform our twenty-first century context on how to create and sustain a more just and equitable society? In his own day, Augustine spoke to conditions of slavery, conflict and war, violence and poverty, among many others. These conditions, while reflecting the characteristics of our technological age, continue to obstruct our collective efforts to bring about the common good for the global human community. The contributors of this volume have taken great care to read Augustine through the lens of his own time and place; at the same time, they provide keen insights and reflections which advance the conversation of social justice in the present.
