~~The New Financial Architecture: Banking Regulation in the ...~~

The traditional banking model is undergoing rapid and significant transformation fueled by heightened customer expectations, a raft of regulatory mandates, and the convergence of emerging technology with new business models that blurs lines between previously distinct industries. As banks face ever-increasing disruption and fierce competition, they are confronted with the age-old debate – buy versus build – as they assess their traditional front- and back-end platform architecture.

The systems are diverse, and they are getting more complex by the week. Now, financial institutions will need to layer on a more sophisticated view of federated identity management, because companies will be dealing with new classes of users. Systems architecture can be the key to balancing control and accessibility.

## ~~The International Financial Architecture~~

The main thesis of this paper is that, although problems in the US subprime mortgage market triggered the current financial crisis, its deep cause on the financial side is to be found in the flawed institutions and practices of the current financial regime, often referred to as the New Financial Architecture (NFA). (While the global crisis clearly has both financial- and real-sector roots, this paper deals primarily with the former.) 'New Financial Architecture' refers to the integration ...
