Economic freedoms for business and social and labour rights 26 1.5.3. Relevance of tensions for regulatory actors (EU and national level) 27 1.6.

EU Social and Labour Rights and EU Internal Market Law

The European Community consists of the original Euroepan Communities set up in the 1950s and 1960s, whereas the European Union refers to the entire economic and social networks of countries, which includes all 28 member states. ... In other words, national law was overturned in favour of European law. The Different Types of Direct Effect.

European Union Law - Introduction Guide

EU law EU legislation is divided into primary and secondary. The treaties (primary legislation) are the basis or ground rules for all EU action. Secondary legislation – which includes regulations, directives and decisions – are derived from the principles and objectives set out in the treaties.

EU law | European Union

"Monetary financial institutions" (MFIs) are resident credit institutions as defined in European Union (EU) law, and other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credits and/or make investments in securities.

Lists of financial institutions - European Central Bank

Non-economic services, such as the police, justice and statutory social security schemes, are not subject to specific European legislation or to internal market and competition rules. Social services of general interest are those that respond to the needs of vulnerable citizens, and are based on the principles of solidarity and equal access. They can be both of an economic or non-economic nature.

This is the first book to comprehensively analyze the work of Hans Micklitz, one of the leading scholars in the field of EU economic law. It brings together analysts, academic friends and critics of Hans Micklitz and results in a unique collection of essays that evaluate his work on European Economic Law and Regulation. The contributions discuss a wide range of Micklitz' work: from his theoretical work on private law beyond party autonomy, with a special focus on its regulatory function, to the illustration of how his work has built the basis for current solutions such as used in solving the financial crisis. The book is divided into sections covering foundations of private law, regulatory law, competition and intellectual property law, product safety law, consumer contract law and the enforcement of law. This book clearly shows the enormous impact of Hans Micklitz' work on the EU legal system in both scholarship and practice.

Since the last edition of this pre-eminent work five years ago, the European framework in the international setting has substantially changed. Numerous critical developments have highlighted shortcomings in the European structure that seems incapable, in its present complexity, of resolving the apparently intractable problems it confronts. This book's highly respected author is uncompromising: either we have the courage to establish profound, constitutional reforms aimed at renewing the European Union in the collective imagination or we risk contenting ourselves with merely an economic community with a far-from-ideal single market where even the four basic freedoms guaranteeing all actors, individuals and enterprises, are put under discussion. This revision follows the successful format of the previous editions. As before, the author's intensive discussion brilliantly disentangles the complex interrelations among a vast array of economic factors. As a general update, the new edition takes into account such major developments as the mass immigration phenomenon, effects of Brexit on EU laws and policies, and the OECD's project on base erosion and profit shifting (BEPS). Ongoing matters covered include the following: • issues surrounding the euro's sustainability, especially as revealed in ECJ case law; • lack of power of the ECB and other EU institutions in fixing the euro's exchange rate; • the potential EU contribution to reform of the IMF's organization and substantive rules; • ECJ case law on conflicts in the transfer of seat and cross-border mergers; • the role of the European Commission in the regulation of international trade; • limits to the advantages lawfully acquired by multinational enterprises; • transfer pricing in intragroup transactions; • EU supervision of banking groups and international banking cooperation; • corporate social responsibility' and 'codes of conduct'; and • State aid between competition law and the non-discrimination principle. Emphasizing the complex legal regime affecting undertakings in Europe today, Professor Santa Maria presents a thoroughgoing legal analysis of the prominence of corporate and business enterprises in what many theorists see as the intrinsic 'internationality' of social activity in the current era. Previous editions have been applauded for their unremitting emphasis on rules introduced on the basis of multilateral agreements of an unprecedented reach, within which both States and undertakings are made to recognize and to deal with one another. In the new edition, this perspective, daunting in its scope and breadth, is maintained and expanded, providing a synthesizing and enlightening analysis that will be of immeasurable value to all parties with an interest — academic, juridical, or administrative — in this very important area of law.

p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial} This comprehensive Research Handbook analyses and explains the EU's complex system of economic governance from a legal point of view and looks ahead to the challenges it faces and how these can be resolved. Bringing together contributions from leading academics and top lawyers from EU institutions, this Research Handbook is the first to cover all aspects of the Eurozone's legal ecosystem, and offers an up-to-date and in depth assessment of the norms and procedures that underpin the EU's economic, monetary, banking, and capital markets unions.

This insightful book considers the phenomenon of the transformation of enforcement in European economic law while adopting a distinct global perspective. The editors identify and respond to the need for reflection on transformation processes in the area of enforcement by bringing together the leading international and European scholars in a variety of disciplines to share and compare experiences and learning in different areas of law. Rooted in a wide and regulatory understanding of enforcement, this book showcases the transformation of enforcement with reference to both European economic law (especially transnational commercial law, competition law, intellectual property law, consumer law) and to the current context of significant global economic challenges. Comparative perspectives facilitate the formation of a holistic perspective on enforcement that reaches beyond distinct theoretical accounts, political agendas, regulatory systems, institutional patterns, particular remedies, industry sectors, and stakeholder perspectives. As the first comprehensive and comparative analysis of the enforcement of European economic law that reaches beyond closely confined areas of law, it constitutes a crucial contribution to the theoretical and policy questions of how to design a coherent European enforcement architecture in accordance with essential principles and objectives of the EU economic order This unique study will have broad appeal. By exploring enforcement transformations from a legal and a cross-disciplinary perspective, it will be essential reading for scholars, practitioners and policymakers from different disciplines.

European Economic Law presents a thoroughgoing legal analysis of the prominence of corporate and business enterprises in what many theorists see as the intrinsic 'internationality' of social activity in the current era. In the course of its intensive discussion, the book brilliantly disentangles the complex interrelations among a vast array of economic factors. Since the last edition of this pre-eminent work five years ago, the European framework in the international setting has substantially changed. Numerous critical developments have highlighted shortcomings in the European structure that seems incapable, in its present complexity, of resolving the apparently intractable problems it confronts. This book's highly respected author is uncompromising: either we have the courage to establish profound, constitutional reforms aimed at renewing the EU in the collective imagination or we risk contenting ourselves with merely an economic community with a far-from-ideal single market where even the four basic freedoms guaranteeing all actors, individuals and enterprises are put under discussion. What's in this book: This revision follows the successful format of the previous editions. As a general update, the new edition takes into account such major developments as the mass immigration phenomenon, effects of Brexit on EU laws and policies and the OECD's project on base erosion and profit shifting (BEPS). Ongoing matters covered include the following: issues surrounding the euro's sustainability, especially as revealed in European Court of Justice (ECJ) case law; lack of power of the ECB and other EU institutions in fixing the euro's exchange rate and in facing the music on the spread's issues; the potential EU contribution to reform of the IMF's organization and substantive rules; ECJ case law on conflicts in the transfer of seat and cross-border mergers; the role of the European Commission in the regulation of international trade; limits to the advantages lawfully acquired by multinational enterprises; transfer pricing in intragroup transactions; EU supervision of banking groups and international banking cooperation; 'corporate social responsibility' and 'codes of conduct'; and State aid between competition law and the non-discrimination principle. Emphasizing the complex legal regime affecting undertakings in Europe today, Professor Santa Maria recognizes the propelling role of the ECJ in the development of European economic law - including the 'proportional' exercise of control in the court's case law - as well as the Commission's responsibility for 'managing' European trade. How this will help you: Previous editions have been applauded for their unremitting emphasis on rules introduced on the basis of multilateral agreements of an unprecedented reach, within which both States and undertakings are made to recognize and deal with one another. In this fourth edition, this perspective, daunting in its scope and breadth, is maintained and expanded, providing a synthesizing and enlightening analysis that will be of immeasurable value to all parties with an interest - academic, juridical or administrative - in this very important area of law.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law covering merchants' status and obligations – including the laws governing state intervention in economic activities – in the European Union provides quick and easy guidance on such commercial and economic matters as business assets, negotiable instruments, commercial securities, and regulation of the conditions of commercial transactions. Lawyers who handle transnational business will appreciate the explanation of local variations in terminology and the distinctive concepts that determine practice and procedure. Starting with a general description of the specifically applicable concepts and sources of commercial law, the book goes on to discuss such factors as obligations of economic operators and institutions, goodwill, broker/client relations, commercial property rights, and bankruptcy. Discussion of economic law covers the laws governing establishment, supervision of economic activities, competition law, and government taxation incentives. These details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Thorough yet practical, this convenient volume is a valuable tool for business executives and their legal counsel with international interests. Lawyers representing parties with interests in the European Union will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative commercial and economic law.

European economic integration has relied on policies intended to make the European Union strong and resilient economically, socially and politically. The Eurozone crisis and Brexit have demonstrated, however, how fragile this hope was and how contested reforms to the major European economic policies have become. Dariusz Adamski explains the evolution of these policies - from the Economic and Monetary Union to the internal market, international trade, the EU's climate policy, as well as its redistributive policies - and demonstrates how this evolution has made European economic integration increasingly frail. He shows how erroneous economic and political assumptions regarding the direction of the European integration project have interplayed with the EU's constitutional context. Arguing that flaws in individual policies contributing to European economic integration can be remedied in compliance with the existing constitutional setup, he explains why such solutions would be economically beneficial and politically feasible.
